DESIGN PRINCIPLE

This is a **first-time teaching** session, not a revision. Compressing 45 minutes into 15 does not mean rushing two topics badly — it means teaching **ONE topic properly** rather than two topics superficially. Every core pedagogical component from the 45-minute master structure survives here: overview, full diagram-built topic teaching, full split-screen construction, live Q&A; with Penta-Intelligence mapping, broader significance, and mind-map closure. Nothing is skipped — only scoped to a single topic and time-tightened.

WHY SINGLE-TOPIC, NOT TWO

The 45-minute deck allocates ~14.5 minutes per topic (7 + 5 + 2.5 minutes) because genuine first-time comprehension needs full diagram-building and full split-screen construction. Squeezing that ratio to fit two topics into 15 minutes would drop core teaching time below the threshold needed for real understanding. So this format teaches one topic completely, at full pedagogical integrity, rather than two topics at reduced integrity.

THE 15-MINUTE STRUCTURE — AT A GLANCE

"HIE COMPRESSED FIRST-TEACH PROTOCOL" — 7 SLIDES

1	Overview of Topic What we're learning and why it matters — compressed to essentials, straight into intent, no filler.	01:00
2	Contents of This Session One-glance map of the journey ahead. With a single topic, this frames the arc rather than listing items.	01:00
3	Topic — Visual Display, Diagrams & Multilingual Emphasis Full diagram build, gold-highlighted keywords, Hinglish/multilingual terms tested for grasping power. Carries the MOST time — first-time comprehension depends on it.	05:00
4	Split-Screen — Technical vs Relatable Reference LEFT: technical explanation. RIGHT: movie/cricket/daily-life reference anchoring the same concept. Full fresh build — first time the learner sees this anchor.	04:00
5	Q&A, Discussion & Opinion — Penta-Intelligence Mapping Live mapping to IQ, EQ, Critical Thinking & Research Skills. One round (single topic, not two).	02:00
6	Broader Picture — Significance & Industry Relevance Compressed to the core 'why this matters in the real world' point with one industry/news example.	01:00
7	Mind-Map Revision & Keyword Recap Technical content + relatable example + spoken keywords, unified in one closing visual.	01:00
TOTAL SESSION		15:00

PROPORTIONAL LOGIC vs THE 45-MINUTE MASTER DECK

Component	45-Min Weight	15-Min Weight	Rationale
Overview + Contents	5.5m /45 (12%)	2m /15 (13%)	Framing stays equal — orientation can't be skipped
Core Topic Teaching	7m /14.5 (48%)	5m /12 (42%)	Slightly tightened but still dominant
Split-Screen	5m /14.5 (34%)	4m /12 (33%)	Ratio near-identical — memory-encoding can't compress further
Q&A / Psychometrics	2.5m /14.5 (17%)	2m /12 (17%)	Ratio held exactly — verification is non-negotiable
Broader Picture	5m /45 (11%)	1m /15 (7%)	Compressed hardest — contextual, not core comprehension
Mind-Map	5.5m /45 (12%)	1m /15 (7%)	Fast visual anchor, not a full brainstorm

BINDING RULES CARRIED OVER UNCHANGED

- **Split-screen mandate** (Slide 4): LEFT technical, RIGHT relatable — mandatory, freshly built, never reused.
- **40/60 simplification ratio** within Slides 3–4 — 40% relatable, 60% core technical.
- **Penta-Intelligence tagging** — IQ, EQ, SQ, Critical Thinking & Research Skills live on every Q&A; response.
- **16:9 visual ratio**, diagram + font-emphasis mandate across all slides.
- **Hinglish / multilingual hooks** required in Slides 3 and 4.
- **Transcript protocol** — slide numbers declared aloud with pauses; opens with the learner's own onboarding answers.

WHAT'S GENUINELY DIFFERENT FROM THE 45-MINUTE VERSION

- ① One topic, not two — the only structural cut; everything else is compression, not omission.
- ② One Q&A; round instead of two — verification happens once, at higher density.
- ③ Broader picture and mind-map are punch-lines, not builds — they close the loop fast.

SAMPLE TRANSCRIPT — SLIDE-SWITCH PROTOCOL

Tutor voice, first-person, spoken aloud during the session

OPEN	Namaste! Aaj hum seekhenge [Topic] — remember, in your onboarding YOU told me your goal is [Q21 answer]. Let's go.
→ SLIDE 1	...pause... Slide 1 — the overview. One minute, then we dive in.
→ SLIDE 3	...pause... Slide 3 — the main event. Watch the diagram. GOLD words are the ones your brain must keep.
→ SLIDE 4	...pause... Slide 4 — screen splits! Left side: the real technical thing. Right side: think of [movie/cricket reference matched to humour profile]. Same concept, two doors.
→ SLIDE 5	...pause... Slide 5 — quick round. I ask, you answer. I'm scoring your IQ, EQ, CTQ and RRQ live. No pressure. Okay — thodi si pressure.
→ SLIDE 6	...pause... Slide 6 — zoom out. Why does this matter this week? Here's what just happened in the real world...
→ SLIDE 7	...pause... Slide 7 — mind map. Everything in one picture. Say the keywords aloud with me — chalo, together.

ROUTING — HOW THE ONBOARDING FORMS FEED EACH SLIDE

Slide	Fed By	Personalisation Applied
1, 2	4.1 Q1, Q21 · 4.3 Q43	Goal-stated hook; named-doubt framing as the session's purpose
3	4.1 Q2–Q4, Q6–Q7	Difficulty weighting; language channel; mother-tongue/Hinglish hooks
4	4.1 Q9–Q11	Humour profile drives the relatable reference chosen (movie/cricket/etc.)
5	4.1 Q16–Q20	Psychometric-calibrated Q&A difficulty matched to learner's HIQ baseline
6	4.1 Q15, Q25 · 4.2 Q36	Career-goal significance; industry-news relevance
7	4.3 Q44	Mind-map checks the session's stated outcome was achieved

This format is one of three adaptive session lengths in the HIE AI Tutor's Scheduler agent (15 / 30 / 45 minutes), auto-selected from Section 4.1 Q14 (available daily time) and Section 4.3 Q41 (desired depth & duration). All three preserve full pedagogical integrity — only scope and pacing change.
